Quantitative Export Factsheet
Instructions & Template

This Quantitative Export Factsheet highlights the prospects of a product exported by your country to a target market. It is an important decision-making tool for businesses and policy makers.

You will find most of quantitative data needed for its elaboration in ITC's tools.

Steps

☑ Select one export destination country and one product with a well-defined HS code and do your research using these sources:

- Trade Map (www.trademap.org) for export-import flows and trade indicators
- Market Access Map (www.macmap.org) for tariffs, non-tariff measures and trade agreements
- E-ping (www.epingalert.org) for potential non-tariff measures
- Export Potential Map (exportpotential.intracen.org) for promising markets

Some required information, marked with an asterisk (*), is not in these tools so you will need to search additional reliable sources.

☑ Fill-in the fields marked by brackets [ ]

☑ Remove this page, instructions, borders, grid and brackets after filling-in the template.

Quantitative Export Factsheet

[product_name] to [target_market]
[month_year]

[Place your logo here]

Introduction

This Quantitative Export Factsheet provides strategic information about exporting [product_name] HS Code [hs_code] from [your_country] to [target_market]. It provides reliable market intelligence from ITC and other sources about important variables including the market size and growth, competition, trends in prices, import tariffs and market regulations.

The Product

[Good quality picture of the product]

Total exports from [Your country] in N/A to the world	USD [value]

Opportunity Summary

[Brief summary of why an exporter should consider exporting the product to the selected market – consider the market size, growth, competitiveness of your country, geographical proximity, ease of market access among other factors]

Target Market - [Name of Country]

[World map or regional map highlighting target market's country location]

Rank in World for Imports of this Product	[world_rank]
Capital City	[capital_city] *
Population	[population] *
GDP per capita	[population] *
Currency	[population] *
Languages	[population] *
Country profile	[web-link to country profile] *

Size of the Market

In N/A [target_market] imported USD [tm_total_imports] of [product_name]s from the world, which represented [tm_share_of_world] % of world imports of the product. In the same year, [Target market] imported USD [imports_from_yc] of the product from [your_country], which means [your_country] has a [yc_share_of_tm] % of [target_market]'s imports.

Growth of the Market

Over the last five years, the value of [Target market]'s imports from the world of [product] grew by [tm_growth_cagr] % per annum. This market performance was [tm_vs_world_growth] than the world's growth in imports of [product_name], which grew by [world_growth_cagr] %. So [target_market] share in world imports of [product_name] has been [tm_share_trend]. It should be noted that in the most recent year [period] this growth rate was [sustained / not sustained] with the market [tm_last_year_trend] by [tm_last_year_growth] %.

The value of [target_market]'s imports from [your_country] grew by [yc_growth_cagr] % per annum over the last five years, which compared with the overall market growth means [your_country] [yc_share_change] market share.

[Line graph of target market's total imports of the selected product in the last 5-10 years]

[Comments on imports' seasonality aspects, if any.]

Unit Value*

The average unit value of [target market]'s imports of [product] in N/A was [value] USD/ [unit]. This was [more than/less than] the world unit value for the product of [value] USD/ [unit].

Over the last five years, [target market]'s unit value has been [appreciating/depreciating]. This should be seen in the context of the world unit value for [product], which was [appreciating/depreciating].

The unit value paid by [target market] to [your country] was [value] USD/ [unit], meaning [your country] commanded a [higher / lower] than average unit value in the market. [Your country] 's unit value has [appreciated/depreciated] over the last five years in this market.

Among the top five suppliers to the market, those countries whose unit value appreciated over the last five years include: [country 1]; [country 2]; etc.

With respect to the top ten suppliers, considering the [wide/narrow]; range between the highest unit value of [value] USD/ [unit] paid to [country X] and the lowest unit value of [value] USD/ [unit] paid to [country Y], we can surmise that the [product] market in [target market] is [rather heterogeneous/somewhat homogeneous]. The heterogeneity may be a result of differences in the quality, variety and/or branding of the product.

*The unit value in a market is calculated by dividing the value of imports by the quantity of imports. It can be a useful proxy for the average price of the product in a market.

Competition

Supply to [target market]'s market for [product] is [not concentrated / moderately concentrated / concentrated], with the top three exporters, [s1_name]; [s2_name]; [s3_name] having market shares of [s1_share] %, [s2_share] % and [s3_share] % respectively.

[Pie graph showing last year's market shares of main suppliers of the selected product to the target market]	• Among the top ten suppliers to the market, those that have increased their market share over the last five years include [suppliers_gaining_share] • Besides [your country] other suppliers from [your_region] include: [regional_competitors]

Market Access

[your_country] [benefits from / does not benefit from] preferential market access in [target_market] for [product].

[if applicable] Relevant preferential trade agreements include: [enter name(s) of trade agreements]

The following table shows the national tariff line product codes used by [target market] to describe [product]. It also shows the minimum tariff applied to [your_country] compared with the tariff applied to the top 3 competitors.

National tariff line code in [target_market]	Product Description	MFN or general tariff	Lowest tariff faced by [your_country]	Lowest tariff faced by [Competitor A]	Lowest tariff faced by [Competitor B]	Lowest tariff faced by [Competitor C]
[00.00.00.00.00]	[product description]					
[00.00.00.00.00]	[product description]					
[00.00.00.00.00]	[product description]					
[00.00.00.00.00]	[product description]					
[00.00.00.00.00]	[product description]					

[short analysis of tariffs and tariff rate quotas *if applicable* for example]

- [your country] [has/does not have] a preferential tariff advantage over key competitors in [target market] for [product]
- [if applicable] Apart from the top three suppliers, other top five suppliers facing preferential tariffs in [target market] include: [enter countries]
- [or if applicable] None of the top five suppliers has preferential market access.
- [if applicable] To benefit from preferential market access to [target market], exporters from [your country] must comply with Rules of Origin of the preferential trade agreement(s). These can be researched at this *link* The Certificate of Origin can be downloaded here. [List if relevant information about obtaining it]
- [if applicable] [target market] applies a tariff rate quota on imports of [product]. The quota volume is [enter volume] and it is applied [all year round / from date to date]. Once the quota volume is filled the outside quota tariff rate is [enter tariff rate].
- [if applicable] Other duties applied by [target market], to imports of [product] from [your country] include [enter information about trade remedies and other applicable duties]

To export [product] to [target market], exporters from [your country] need to comply with **mandatory market access requirements (non-tariff measures)**. Details of these are available at ITC's [Market Access Map]() and are summarised as follows:

[A list of identified market access requirements.

If available, provide web-links to further sources of specific information]

Potential new non-tariff measures

[Use https://epingalert.org to identify possible new market access requirements to be applied.

If available, provide web-links to further sources of specific information. Explain whether these requirements could be of concern / present difficulties for exporters from your country and why].

If there are no notifications on epingalert.org, insert the sentence:

While there were no notifications pertaining to [product] at the time of preparing this Export Opportunity Insight, exporters are advised to regularly check https://epingalert.org to identify possible new sanitary or phytosanitary measures (SPS) and technical barriers to trade (TBT) notified by target market] to the World Trade Organisation (WTO).

Potential Business Partners

ITC's Trade Map provides information on the contact details of companies that import [product] in [target market]. Some examples are provided below. Visit www.trademap.org for details of additional companies.

Company Name	City	Website
